

3· GC Septa

PREMIUM SEPTA

Premium Septa - are preconditioned and packed in glass jars. Premium Septa generally have much lower bleed than general purpose septa.

Marathon with CenterGuide

CenterGuide™ Septa for Improved Performance

- Center point guides the needle for easy penetration
- Reduce needle bending
- Precision molding assures accurate fit
- Available in selected sizes of our premium septa

Precision-molded septa have a recess on the injection side, to guide the syringe needle to the same point with every injection. The CenterGuide design requires less force for initial penetration, for a smoother feel. Septum life may be enhanced in some applications by minimizing tearing and coring.

Septum	High Temperature	Long Life	Low Bleed	Suggested Applications
Marathon™	✓	✓	•	Autosampler use; extremely long lifetime, trace analysis
BTO®	✓	•	✓	High injection port temperature, lowest bleed, trace analysis
Advanced Green 3™	✓	•	•	General purpose use; low sticking

Upper Temperature Limit

Septa BTO, Marathon and Advanced Green 3 can be used at 400°C and higher injector set point temperatures in most instruments. Slight sticking may occur in new injection ports when holding septa above 300°C over periods of many days.

Septum Without CenterGuide™

Septum With CenterGuide™

CenterGuide can help reduce coring when used with tapered (rounded-tip) needles.

Septa BTO®

- Extended temperature range, low-bleed
- Maximum temperature 400°C
- Virtually eliminates injection-port sticking
- Pre-conditioned; packaged in glass to prevent contamination
- Each batch GC-FID tested
- Ideal for use with low-bleed, "Mass Spec" capillary columns

Septa BTO is Bleed and Temperature Optimized for today's most demanding GC and GC/MS applications. Septa BTO is formulated to extend low-bleed and outstanding mechanical properties of premium GC septa to the highest-temperature applications. It retains remarkable softness and pierceability at high temperatures, with extremely low bleed. Septa are 3 mm thick, and are packaged in glass vials.

Advanced Green 3TM

- True low-bleed, high temperature green septum
- Maximum temperature 400°C

The GIBNIK Advanced Green 3 Septum was specifically created to combine significantly longer injection life, low bleed and low injection port adhesion. The result is a green septum you can use for all your critical analyses. Advanced Green 3 Septa are packaged in glass vials for high purity. Septa are 3 mm thick.

Marathon™ Septa

Excellent Performance with Long Injection Life

- Outstanding lifetime
- Premium septum for autosamplers
- CenterGuide™ Marathon are pre-pierced for extremely reliable performance
- Up to 400 injections per septum
- Maximum temperature setting 400°C

The GIBNIK Marathon septum typically achieves 400 injections without failure, when used with a rounded-tip (Agilent-style) needle and autosampler or needle guide. The CenterGuide versions of Marathon are pre-pierced to channel the needle through the same spot with each injection, which helps eliminate the common type of coring that occurs on the first injection. The Marathon septum is also ideal for standard manual-injection GC and GC/MS. Septa are 3 mm thick, except Shimadzu-style plug septa. Septa are packaged in glass jars.

GENERAL-PURPOSE SEPTA

Puresep T™

- The better PTFE coated septum
- Recommended maximum temperature is 225°C

Silicone-based septum is faced on one side with a double layer of polyimide and PTFE. The polyimide adheres to both the silicone and PTFE, providing a better bond and enhanced durability. The outer PTFE coating assures maximum inertness and helps minimize bleed.

Description	Qty	Item No.
1/4" (6.0 mm) Puresep T	50/pk	AUC230665

13 mm Puresep T	50/pk	AUC230698

Puresep T

Puresep P™

- Made from silicone rubber coated with a layer of high-temperature polyimide
- 3 mm thick

The polyimide layer is stable to 400°C, however the recommended upper limit for the septum as a whole is 300°C, due to the characteristics of silicone.

Puresep P

Ultrasep® R

This is a good general-purpose septum. Ultrasep R has a 45 - 55 durometer hardness rating and is easy to penetrate. The upper temperature limit is 350°C. They have a long injection lifetime at 300°C.

Description	Qty	Item No.

Microsep Septa F-138

Microsep® Septa F-138

This is a general-purpose septum recommended for low-temperature use. Microsep Septa F-138 is made of a special silicone rubber formulation with a PTFE backing. It is pre-treated by washing in distilled water, then baking under vacuum at 200°C. Off-white color. The septa stabilize rapidly after installation to minimize septum bleed.

Description	Qty	Item No.
1/4" (6.0 mm) Microsep F-138	50/pk	AUC220625
3/8" (9.5 mm) Microsep F-138	50/pk	AUC220900

Economy Blue Septa

Economy Blue Septa

Our Blue Septa are designed for non-demanding, routine applications. They are easy to penetrate, with a durometer rating of 40 - 45. The septa can be used up to 200 - 250°C and are suitable for 90% of all GC analyses. Made from silicone.

Description	Qty	Item No.
1/4" (6.4 mm) Economy Blue Septa	100/pk	AUC234625
3/8" (9.5 mm) Economy Blue Septa	100/pk	AUC234905
7/16" (11 mm) Economy Blue Septa	100/pk	AUC234115
1/2" (12.7 mm) Economy Blue Septa	100/pk	AUC234125

AUC960270

Microsep F-145 Cylindrical Septa

These can be used with glass columns or any item with a standard cylindrical septum port, such as gas sampling bulbs. Microsep F-138 with a PTFE facing is molded into red silicone, for three-layer protection. Half-depth hole design. Dimensions are approximately 6 x 8 mm.

Description	Qty	Item No.
Cylindrical Septa	50/pk	AUC960270

ACCESSORIES

Septa Sheets

For those with special size requirements or special applications. Sheets are approximately 11.5" x 11.5" x 1/8" (3 mm).

Injection Port Cleaning Kit

This is designed for cleaning all GC injection ports, including those in Shimadzu instruments. Included are three stainless steel brushes, 5 mm (for Shimadzu), 1/4" and 3/8", and one scraper for removing septum residue.

Description	Item No.
Injection Port Cleaning Kit	AUC206211

AUC206211

Septa Pick

The Septa Pick is useful for removing small pieces of septa lodged in the threads and corners of the septum cap or injection port. It can also be used to remove small bits of graphite ferrule from the cap and fittings of column connectors; other small cleaning jobs.

Description	Item No.
Septa Pick	AUC205465
